

# More than just delivering plastic

Providing product development from...

## 'Art to Part'

**Concept and design**

**Knowledge that delivers**

**Tel: 08705 538 538**  
**www.distrupol.com**

Distrupol is a European leader in the sales, marketing, distribution and application development of an extensive range of thermoplastic polymers and elastomers

## **Application Development**

### **Concept & Design**

Our experience can assist you in translating conceptual ideas into optimum products, through qualified advice on product design.

### **Material selection**

We can help select the most suitable material for any application "Fit for Purpose". Considerations such as automotive, medical or food contact legislations. Requirements like heat performance, impact resistance and mechanical strength etc.

### **Tooling**

We understand the properties and processing characteristics of our materials and are therefore well placed to give advice and assistance to toolmakers. To avoid unnecessary delays, by providing advice to overcome any tooling difficulties, such as gate position, moulding stress, weld lines, cooling channels, sink marks etc.

### **Testing/Sampling**

Our engineers have a deep knowledge-base and the resources to trial new processes or to run and test new materials. We can also provide natural or coloured materials from 5 Kg to 25 Kg for trials.

### **Optimising production**

With our on-call expertise we can aid in the fine-tuning and optimisation of your production, to reduce cycle times, scrap rates and deliver the most effective and efficient products.
