

QUALITY POLICY

Distrupol BV is totally committed to achieving the highest levels of quality in all areas of its business.

The senior management of Distrupol BV will establish measurable quality objectives for the business and ensure that these are appropriately communicated and understood at all levels in the organisation. Distrupol BV will then periodically and systematically review its performance against these objectives.

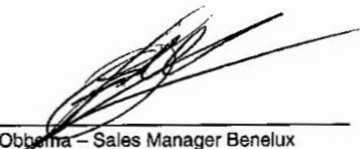

Distrupol BV recognises that if these objectives are to be achieved, all employees must share in its commitment and be encouraged to take a responsible role in continuous quality improvement.

In the competitive market area in which Distrupol BV is involved, customers needs and expectations from its suppliers are continually increasing. Distrupol BV will endeavour to fully understand its customers needs and expectations and exceed them where feasible to do so.

A major part of the Companies strategy towards meeting its objectives is to continue to meet the requirements of BS EN ISO 9001.2000. Approval of its management systems to this Standard will demonstrate to customers that Distrupol BV is committed to providing a level of service that will as a minimum meet their needs and expectations now and in the future.

Distrupol BV is committed to strive for quality improvement. It is clearly recognised that meeting the requirements of the Standard is the only basis for good quality performance and customer satisfaction.

Conformance to all processes and systems recorded in the Quality Manual are mandatory to all employees.
