

# How we can help you succeed

*Distrupol recognises that the automotive industry can be a demanding place to operate.*

**Distrupol has a formidable range of plastic materials**, giving you solutions for any requirement. Our world-class suppliers include DuPont, Ineos, Lucite International and Chi Mei. We also have a range of polymer modifiers and additive masterbatches, giving you a tailored solution to any problem.

**We can technically support our range of materials**, assisting you with design, material selection, mould flow simulation, performance requirements and sampling, right through to fully optimised production.

#### **Total quality, certification, traceability, confidence and logistical excellence**

Authenticity and traceability of the materials being used for your components is critical. We can supply you certificates of conformity and analysis with every delivery, **giving you full traceability and confidence** that you, and your moulders, are using the right material that is certified and in specification.

The key elements of our Quality Management System (QMS) are customer focus and continuous improvement. With this in mind, we often work with customers to meet requirements specific to their QMS, which very often **go beyond the scope of ISO 9001**.

Distrupol would be very happy for you, or your customers, to carry out site audits and review our systems and processes giving you the confidence and service this market demands.

**Logistical excellence is a standard for us**. We operate our own warehouse, meaning we can offer you next-day deliveries and bespoke stockholding agreements. Let us take on some of your stock management responsibility.

#### **Distrupol Automotive:**

- *Colour solutions*
- *Low emissions for interiors*
- *Low wear / low friction*
- *Flexible solutions*
- *Sustainable material solutions*
- *Metal replacement*
- *High gloss solutions*
- *High heat solutions*
- *Enhancing scratch/scuff resistance*
- *Low wear/low friction solutions*
- *Adhesives and polymer coatings*
- *Wire and cable solutions*
- *Zero halogen flame retardant solutions*
- *Enhancing toughness*
- *Clear material solutions*
- *Low gloss solutions/textures*
- *PVC and Rubber replacement*
